

WORLDCHEM MZ 504

SOLVENT BASED SOLAR PANEL PAINT REMOVAL AGENT

Product Highlights:

- ✓ Will not damage the surface of the solar panel
- ✓ Removes paint residues from solar glass
- ✓ Easy to use
- ✓ Safe and powerful formula
- ✓ Fast-acting solvent blend
- ✓ Suitable for industrial cleaning applications

MZ 504 effectively eliminates different types of paint residues from solar module glass surfaces. Whether it's interior paints, exterior coatings, multi-surface enamels, or water-based spray paints, MZ 504 is designed to tackle them all.

Directions for using the product:

1. Ensure the surface is cool and free from direct sunlight.
2. Apply the product evenly onto the contaminated area using a spray, cloth, or applicator.
3. Allow sufficient dwell time (typically 2–10 minutes depending on contamination type and thickness).
4. Agitate gently if necessary using a soft cloth or non-abrasive pad.
5. Remove dissolved residues with a clean cloth or rinse with water.
6. Repeat application if heavy contamination persists.

Important: Always perform a spot test before full application.

- Do not let it come into contact with the panel frame.
- Do not apply on hot surfaces or under direct sunlight.
- Use in well-ventilated areas.

Appearance: Colorless transparent liquid;

Odor: Characteristic

Storage:

Store in a tightly closed container in a cool, dry, and well-ventilated area. Protect from direct sunlight, heat sources, and ignition sources. Keep away from incompatible materials.
